

## Nautic Alert VTracker

### Product Comparison

| Capabilities                            | Nautic Alert VTracker     | Competitor Product 1.0 | Competitor Product Elite |
|---|---------------------------|------------------------|--------------------------|
| MSRP                                    | \$999                     | \$1,124                | \$1,900                  |
| Input voltage requirements              | 6-36V                     | 10-32V                 | 10-32V                   |
| Power consumption                       | 0.7W                      | 1.4W                   | 1.4W                     |
| Satellite communication network         | Iridium                   | Inmarsat               | Inmarsat                 |
| Mobile application                      | Yes                       | Yes                    | Yes                      |
| 2-way texting                           | Yes                       | No                     | No                       |
| Email notifications                     | Yes                       | Yes                    | Yes                      |
| Location updates                        | Yes + 2-way interaction   | Yes                    | Yes                      |
| Waypoint breadcrumb history             | Yes                       | Yes                    | Yes                      |
| Global fleet geofencing                 | Yes                       | Yes                    | Yes                      |
| Next Gen GPS technology, aviation grade | Yes                       | No                     | No                       |
| Geofence precision                      | 250ft / 50 ft *           | 1500 ft                | 1500 ft                  |
| Low profile antennas                    | Yes                       | No                     | Yes                      |
| SAR/ Hostage/ Panic button input        | Yes + global monitoring * | No                     | Yes                      |
| Intrusion detection sensor input        | Yes                       | No                     | Yes                      |
| Anchor alarm                            | Yes                       | No                     | No                       |
| Remote engine kill output               | Yes                       | No                     | No                       |
| Bilge float switch input                | Yes                       | No                     | No                       |
| Cloud Watch antenna jamming detection   | Yes (optional)            | No                     | No                       |
| Battery voltage trends                  | Yes                       | No                     | No                       |
| Battery voltage monitoring              | Yes                       | No                     | No                       |
| Primary power source loss               | Yes *                     | No                     | Yes                      |
| Backup battery                          | Yes (optional) *          | No                     | Yes                      |
| Backup battery source input             | Yes                       | No                     | No                       |
| Warranty                                | 2-years                   | 1-year                 | 1-year                   |

#### VTracker Configuration Options

- (a) Intrusion + Bilge + Remote Kill or;
- (b) Intrusion + SAR/ Hostage button or;
- (c) Bilge + SAR / Hostage button

\* Geofence 50' precision requires optional performance antennas.

\* Global monitoring is optional.

\* Primary power source loss requires optional backup battery.

\* Optional backup battery supported: 8.4V, 12V, 24V
